Highly motivated IT Engineering student seeking a two-month summer internship (July-August) to apply my skills Full-stack Web Development (PHP, Javascript, HTML, CSS) and algorithmic problem-solving in a challenging international environment

KEY PROJECTS

Student Life Management Webside (Full-stack Project)

ongoing

- **Objective** : Developing a Full-stack site to manage student clubs and events.
- **Features** : includes an Administrator section and a User section with login/authentication
- **Technologies** : PHP, HTML, Javascript, CSS, Github

Evolutionary Algorithms Modeling (Flibs)

03/2025 - 06/2025

- **Context** : Project focused on evolutionary algorithms based on Darwin's theory (Flibs)
- **Work** : Modeling and simulating the evolution of abstract organisms (Flibs) for environment prediction, including mutation and crossover mechanisms.

Connected Home Project (Micro:bit)

09/2024 - 12/2024

- **Objective** : Developed a smart home system using Micro:bit and Micropython
- **Features** : Integrated various sensors (temperature, gas, movement) and actuators for automated management (windows, security alerts).

Tetris Game Development (python)

09/2024 - 12/2024

- **Objective** : full development of the classic Tetris game using Python with pygame library.
- **Work** : Created game mechanics, user interface, and scoring system, strengthening programming and game design skills

PROFESSIONAL EXPERIENCE

Network and telephony Administration Internship, Grand Calais terres & mers, Calais, France

02/2025 - 03/2025

- Assited with the preparation of active equipment (switches) and telephony devices. Supported field technicians.
- Acquired skills : ToIP, Network troubleshooting, virtualization.

EDUCATION

IT Engineering Program (Apprenticeship track), EILCO, Calais, France

09/2025 - 06/2028

- **Key Subjects** : Development (php, Java, C/C++), Machine Learning, Framework (React.js, Laravel, Next.js, database (SQL))

Preparatory classes (Mathematics, Physics, IT), EILCO, Calais, France

09/2023 - 06/2025

- **Skills** : Proficiency in SQL, OCaml, and Python for scientific computing and algorithms

Scientific Baccalaureate (Mathematics, Physics, chemistry), Nkoabang-nkolafamba high school, Yaounde, Camerun

09/2021 - 06/2022

TECHNICAL SKILLS

- **Web development** : PHP, Javascript, HTML, CSS, Node.js, React.js, Angular, Laravel.
- **Languges** : Python, C/C++, Java, R, VBA, MATLAB.
- **Database** : MySQL, PostgreSQL.
- **Data Science & IA** : Power BI, Statistics, Machine Learning.
- **Tools & Systems** : Docker, n8n (Automation), Virtualisation (Virtualbox), Github, pack office

SOFT SKILLS & INTERESTS

LANGUAGES : English : Intermédiate (B2), French : Native

SOFT SKILLS : Rigorous, Autonomous, Hardworking, involved, Organized, Team Player, Analytical, Dynamic

INTERESTS : Combat Sport, Football, Listening (English conversation).
